Forward Looking Statements & Non-GAAP Disclaimer

The following information may contain forward-looking statements, including forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Such forward-looking statements include, but are not limited to, statements concerning Colfax's plans, objectives, expectations and intentions and other statements that are not historical or current fact. Forward-looking statements are based on Colfax's current expectations and involve risks and uncertainties that could cause actual results to differ materially from those expressed or implied in such forward-looking statements. Factors that could cause Colfax's results to differ materially from current expectations include, but are not limited to factors detailed in Colfax's reports filed with the U.S. Securities and Exchange Commission including its 2017 Annual Report on Form 10-K and Quarterly Report on Form 10-Q for the period ended March 30, 2018 under the caption "Risk Factors." In addition, these statements are based on a number of assumptions that are subject to change. This press release speaks only as of the date hereof. Colfax disclaims any duty to update the information herein.

Colfax has provided in this press release financial information that has not been prepared in accordance with GAAP. These non-GAAP financial measures are adjusted net income, adjusted net income per share, projected adjusted net income per share, adjusted operating income, organic sales growth (decline), and organic order growth (decline). Adjusted net income, adjusted net income per share, projected adjusted net income per share, and adjusted operating income exclude Restructuring and other related items, Goodwill and intangible asset impairment charges, Pension settlement loss, and Loss on deconsolidation of Venezuelan operations, to the extent they impact the periods presented. Adjusted net income, adjusted net income per share, and projected adjusted net income per share also exclude the impact of acquisition-related amortization and gain or loss on short term investments, to the extent they impact the periods presented. The effective tax rate used to calculate adjusted net income and adjusted net income per share is 25.7% for the year ended December 31, 2017. Organic sales growth (decline) and organic order growth (decline) exclude the impact of acquisitions and foreign exchange rate fluctuations. These non-GAAP financial measures assist Colfax management in comparing its operating performance over time because certain items may obscure underlying business trends and make comparisons of long-term performance difficult, as they are of a nature and/or size that occur with inconsistent frequency or relate to discrete restructuring plans that are fundamentally different from the ongoing productivity improvements of the Company. Colfax management also believes that presenting these measures allows investors to view its performance using the same measures that the Company uses in evaluating its financial and business performance and trends.

Sales and order information by end market are estimates. We periodically update our customer groupings order to refine these estimates.
