The following information may contain forward-looking statements, including forward-looking statements within the meaning of the U.S. Private Securities Litigation Reform Act of 1995. Such forward-looking statements include, but are not limited to, statements concerning Colfax’s plans, objectives, expectations and intentions and other statements that are not historical or current fact. Forward-looking statements are based on Colfax’s current expectations and involve risks and uncertainties that could cause actual results to differ materially from those expressed or implied in such forward-looking statements. Factors that could cause Colfax’s results to differ materially from current expectations include, but are not limited to factors detailed in Colfax’s reports filed with the U.S. Securities and Exchange Commission including its 2017 Annual Report on Form 10-K and Quarterly Report on Form 10-Q for the period ended September 28, 2018 under the caption “Risk Factors.” In addition, these statements are based on a number of assumptions that are subject to change. This presentation speaks only as of the date hereof. Colfax disclaims any duty to update the information herein.

Colfax has provided in this presentation financial information that has not been prepared in accordance with GAAP. These non-GAAP financial measures are adjusted net income per share, projected adjusted net income per share and Core or organic sales growth (decline). Adjusted net income per share and projected adjusted net income per share exclude Restructuring and other related items, Goodwill and intangible asset impairment charges, Pension settlement loss, acquisition-related amortization, and gain or loss on short term investments, to the extent they impact the periods presented. The effective tax rate used to calculate adjusted net income per share for the year ended December 31, 2017 is 25.7%. Core or organic sales growth (decline) excludes the impact of acquisitions and foreign exchange rate fluctuations. These non-GAAP financial measures assist Colfax management in comparing its operating performance over time because certain items may obscure underlying business trends and make comparisons of long-term performance difficult, as they are of a nature and/or size that occur with inconsistent frequency or relate to discrete restructuring plans that are fundamentally different from the ongoing productivity improvements of the Company. Colfax management also believes that presenting these measures allows investors to view its performance using the same measures that the Company uses in evaluating its financial and business performance and trends.

Sales and order information by end market are estimates. We periodically update our customer groupings order to refine these estimates.
Colfax Strategy – A Winning Model

- Acquire Good Companies
  - Attractive markets
  - Strong brands and solutions
  - Opportunities to improve and expand

- Focus and Empower Top Talent
  - Independent businesses
  - Great leaders, strong teams, winning spirit
  - Lean, high value corporate

- Use CBS to Make Them Great
  - Values
  - Tools & processes
  - Way of working

We use CBS to make good businesses great

\(^{(1)}\) Net (loss) income from continuing operations attributable to Colfax Corporation is calculated using Net (loss) income from continuing operations less the income attributable to noncontrolling interest, net of taxes.

\(^{(2)}\) The effective tax rate used to calculate adjusted net income per share is 25.7% for the year ended December 31, 2017.

*Note: In thousands, except per share amounts.*
