We do not undertake, and hereby disclaim, any obligation to update any forward-looking statements, whether was a result of new information. Nutre developments or otherwise.

Colfax has provided in this presentation certain financial information that has not been prepared in accordance with accounting principles generally accepted in the United States of America ("non-GAAP"). These non-GAAP financial measures include adjusted EBITDA (adjusted EBITDA (adjusted EBITDA), adjusted EBITDA margin, organic (core) sales growth and free cash flow on a segment basis.

Adjusted EBITA represents net income (loss) from continuing operations excluding restructuring and other related charges, acquisition-related amortization and other non-cash charges, European Union Medical Device Regulation ("MDR") and other costs, and strategic transaction costs, as well as income tax expenses (benefit) and interest expense, net. Collka presents adjusted EBITA margin, which is subject to the same adjustments as adjusted EBITA, Further, Collar presents adjusted EBITA (and adjusted EBITA margin, which is subject to the same adjustments as adjusted EBITA. Further, Collar presents adjusted EBITA (and adjusted EBITA margin, and interest expense), net. Collka presents adjusted EBITA margin, environ costs on ad outper we exclude the impact of strategic transaction costs and acquisition-related amortization and other non-cash charges from segment toos; where we exclude the impact of strategic transaction costs and acquisition-related amortization and other non-cash charges from segment toos; where we exclude the impact of strategic transaction costs and acquisition-related amortization and other non-cash charges from segment toorem.

- Adjusted EBITDA represents Adjusted EBITA plus depreciation and other amortization.
- Core or organic sales growth (decline) excludes the impact of acquisitions and foreign exchange rate fluctuations.
- Decremental margin represents the change in Adjusted EBITDA divided by the change in net sales.
- Free cash flow represents cash flow from operating activities less purchases of property, plant and equipment.

These non-GAAP financial measures assist Colfax management in comparing its operating performance over time because certain items may obscure underlying business trends and make comparisons of long-term performance difficult, as they are of a nature and/or size that occur with inconsistent frequency or relate to discrete restructuring plans that are fundamentally different from the ongoing productivity improvements of Colfax. Colfax management also believes that presentially different from the ongoing productivity improvements of Colfax. Colfax management also believes that presentially different from the ongoing productivity improvements of Colfax. Colfax management also believes that presentially different from the ongoing productivity improvements of Colfax. Colfax management also believes that presential and business performance and trends. Non-GAAP financial measures should not to considered in isolation from, or as a substitute for, financial information calculated in accordance with GAAP. Investors are encouraged to review the reconciliation of these non-GAAP measures to their most directly comparable GAAP financial measures provided in the appendix to this presentation.

In this presentation, Colfax presents forward-looking non-GAAP measures, such as Adjusted EBITDA, Adjusted EBITDA and Free Cash Flow on a segment basis. Colfax does not provide such outlook on a GAAP basis because changes in the items that Colfax excludes from GAAP to calculate such measures can be dependent on future events that are less capable of being controlled or reliably predicted by management and are not part of Colfax's routine operating activities. Additionally, management does not forecast many of the excluded items for internal use and therefore cannot create or rely on outlook done on a GAAP basis.

Financial Update and Wrap-Up Chris Hix, EVP & CFO

Colfax Sustainable Model for Compounding Value Creation

2021 Financial Outlook

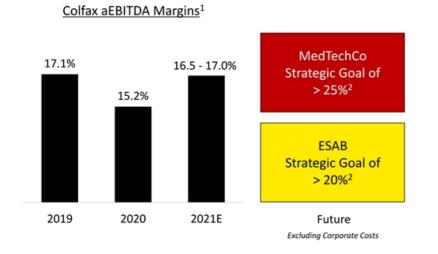

As originally communicated February 18, 2021

ESAB
9%-12%
11%-14%
+ >50 bps
240% Grow

- Expecting robust growth in 2021 in sales, earnings, and cash flow
 - Strong operating leverage, net of investments: MT 50%+, FT 30%+
 - \$25-30M of restructuring benefits
 - ~\$60M of 2020 COVID-driven temp cost actions coming back into businesses in 2021
 - Depreciation of ~\$65M in MedTechCo and ~\$40M in ESAB
- Total corporate costs of ~\$65M, excluding costs relating to the separation
- Q1 Guidance: aEPS of \$0.35 \$0.40

Strong Growth Projected Across Both Businesses in 2021

Strong Paths to Margin Expansion

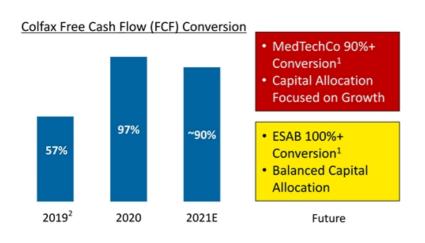

- Strong decremental performance in 2020: ~14 points less than natural operating leverage
- Return to our continuous improvement path in 2021
- Both businesses expected to have future benefit from operating leverage, productivity, innovation, acquisitions
- Expect additional corporate costs of ~\$15M post-separation; total costs splitweighted more to MedTechCo

Clear Lines of Sight to Margin Expansion

¹ See appendix for non-GAAP reconciliations.

² Segment-level aEBITDA margins.

Improved Cash Flow Capabilities

- Stabilized MedTech segment in 2019 .
- . Significant process improvements across Colfax in 2020
- Expecting > \$250M of FCF in 2021; expect to deploy primarily for deleveraging and MedTech acquisitions
- Current performance trajectory points to year-end leverage of low 3x before additional acquisition investments
- Expect to establish prudent capital structures for each business that are consistent with respective capital allocation priorities and strategies

Clear Path for Healthy FCF Generation in Both Businesses

¹ Segment-level operating free cash flow conversion
² Excludes transaction costs and one-time DJO working capital investments

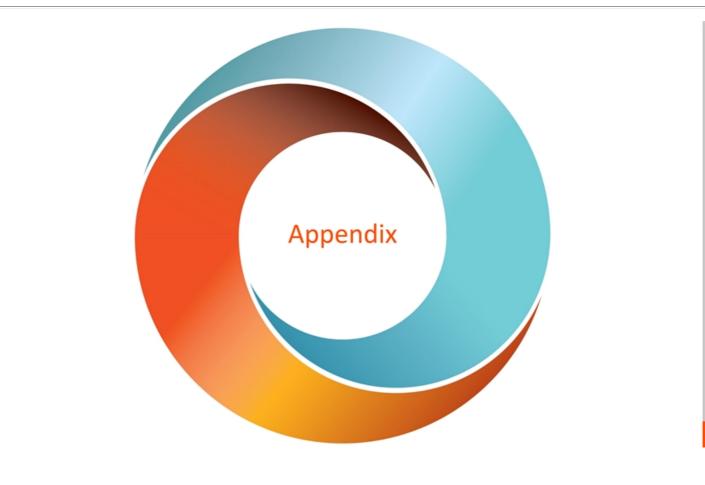

Next Steps
Continue to execute our profitable growth strategy
Determine form of separation, prepare SEC filings
Create separate corporate capabilities
Establish capital structures to match allocation priorities, strategies
Take other steps to satisfy conditions for targeted Q1 '22 separation
